

SailTrac User Tips – REMOTE ACCESS FEATURES

SailTrac provides user's with the ability to update their Trip pages even when direct internet access is unavailable. From any data plan enabled cell phone or wireless device – including low bandwidth single side band radio connected to a pactor modem you can send real time updates to your travel adventures. Our system automatically updates and adds the new information and notifies your Network of Friends to return to SailTrac and view your travels in virtual real time! You may need to consult the user's manual for your particular remote wireless device or data plan enabled cell phone about how to configure your e-mail or remote transmission to SailTrac. Here are the basic content formats for sending information.

Position Report Format

To send a remote position report simply address your e-mail to administrator@sailtrac.com. Spell out POSITION REPORT in capital letters on the Subject line. The information below should be transmitted in the following format and is the default format for traditional position reporting. The time of the position report in the text section of the e-mail should be filed in Greenwich Mean Time (GMT).

The SailTrac system will automatically file the information reported and update your web pages. It will update your Trip information IF:

- 1.) The date and time of the position report e-mail falls between the start and end dates of a trip you have created (not the GMT position report time you indicate in the body of the e-mail).

IF it does, then:

- 2.) The Google Map displayed on your Trip Home Page will update your current position report information with Date/Time (GMT), Latitude and Longitude, Course, Speed, and Comments that you file remotely. Sailtrac will also send a notification to those you have selected to share this trip with that information has been updated in your Trip pages. The most recent position report is always displayed on the Trip Home Page. (NOTE: If you have not filed a position report yet then the default location is the first click point from any Intended Course Route Map you have drawn in conjunction with this Trip.)
- 3.) You may add Comments up to 80 characters in length to any remote e-mail and will additionally be displayed on the Trip Home Page.
- 4.) The system will automatically reach out to our content weather provider and pull back current weather information which will be added to your Trip Home Page from your Latitude and Longitude data you provided.
- 5.) This position report will also update the Position Report Map located on your Maps Tab in your Trip and continue mapping your route underway. (Note: The maps tab displays two different maps – The Intended Course Route that you drew *and* your Position Report map.)
- 6.) If you have checked the "Send Email Alerts to my Friends when I make updates to my Trip" when you created your trip your friends will receive an auto generated e-mail from TrekTrac letting them know you made updates and it will invite them to return to TrekTrac and view your travel adventures.

NOTE: How do we know it is you sending the e-mail? Before you use the remote e-mail features you must visit the My Profile page from your Account Home (once you have logged in). The e-mail you send administrator@sailtrac.com must come from either:

- 1.) The e-mail address that you registered with, or;
- 2.) The secondary e-mail address that you gave at registration or provided us for reference on the My Profile page at a later date.

It's that easy. Give it a try. Create a sample trip and try the remote features. You can always delete it later. Take advantage of the tools we provide...now get out there and make a memorable travel adventure.

Journal Entry Format

To add a remote Journal entry is easy too. Create an e-mail (do not combine with a Position Report e-mail) addressed to administrator@sailtrac.com. Spell out JOURNAL in capital letters on the Subject line. Provide a Posted date in the body of the e-mail. (NOTE: This date does not have to coincide with the date of the e-mail and should you choose to display time it should be adjusted to GMT for your location.) Below the posted date type Message followed by a colon. Type your text.

1284_K6JCN.msg

To: "Sailtrac" <administrator@sailtrac.com> Post Via: WL2K
Cc: Email Gate:
Subject: JOURNAL

Posted: 2007/08/25 16:38
Message: This is how you would format an e-mail to add a remote Journal entry to your active Trip pages even when you can't access the Internet directly.

Once this e-mail is received by SailTrac we will match the date and time of the e-mail (not the posted date of the text entry) to the start and end dates of the Trip you have created and update the journal entry automatically.

The SailTrac system will automatically add the journal entry to your Trip IF:

- 1.) The date and time of the position report e-mail falls between the start and end dates of a trip you have created (not the GMT position report time you indicate in the body of the e-mail).

IF it does, then:

- 2.) The Journal entry is added and your Friends will receive an automatic notification e-mail letting them know you have updated your Trip pages.

NOTE: How do we know it is you sending the e-mail? Before you use the remote e-mail features you must visit the My Profile page from your Account Home (once you have logged in). The e-mail you send administrator@sailtrac.com must come from either:

- 1.) The e-mail address that you registered with, or;
- 2.) The secondary e-mail address that you gave at registration or provided us for reference on the My Profile page at a later date.

Add a Photo Format

To send a photo from any data plan enabled cell phone or wireless device capable of taking and sending photos you simply address your transmission to administrator@sailtrac.com. Put the photo description name in the Subject line. The information below should be transmitted in the following format. The time of the position report in the text section of the e-mail should be filed in Greenwich Mean Time (GMT). Providing a latitude and longitude is optional. Make sure the image you are attempting to transmit is in one of the formats **TrekTrac accepts (.gif, .jpg)**. Then make sure the photo is not cropped or altered from a **standard 4:3 ratio in portrait or landscape** and that the photo is less **than 8 megapixels in size**. **Send only ONE (1) Photo per e-mail transmission.**

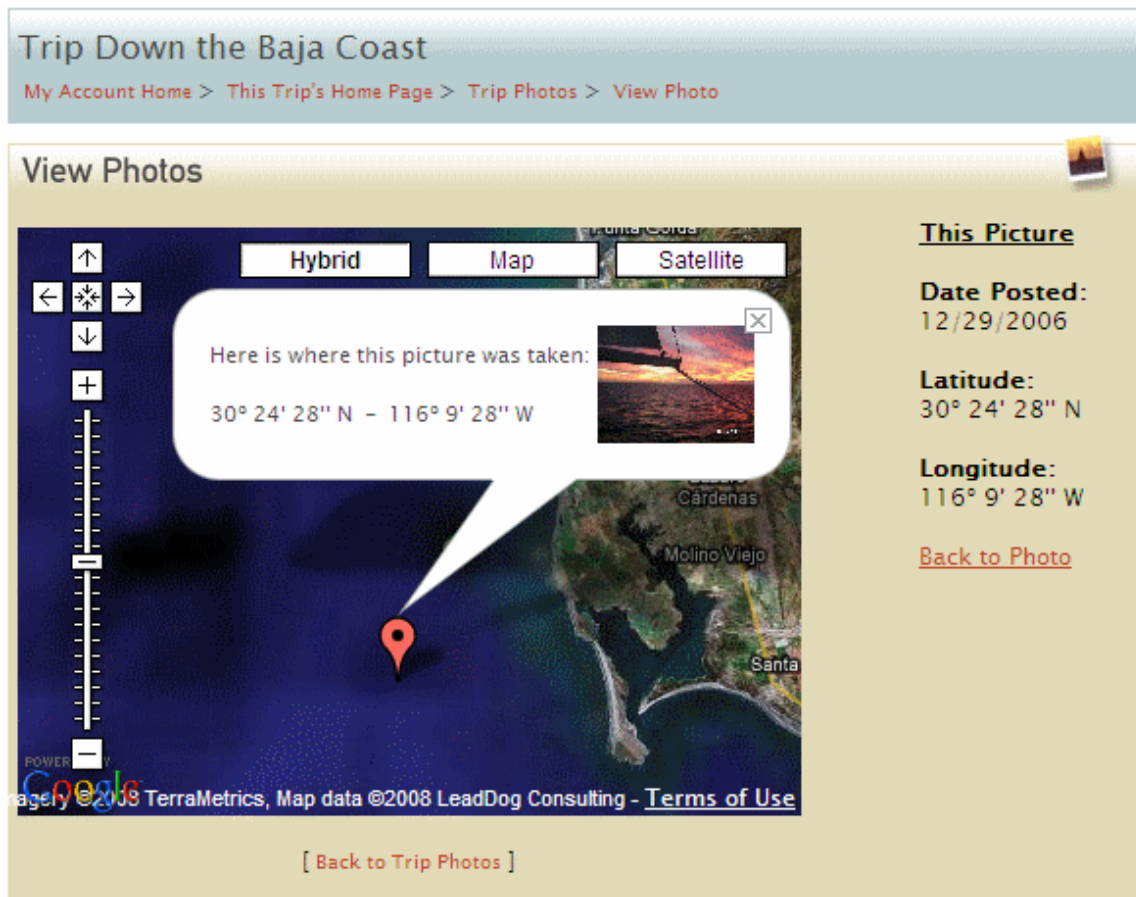

The TrekTrac system will automatically add the photo to your Trip. It will update your Trip information IF:

- 1.) The date and time of the e-mail falls between the start and end dates of a trip you have created (not the GMT time you indicate in the body of the e-mail).

IF it does, then:

- 2.) Your photo will be added to your Trip. If it is geotagged with a latitude and longitude it will also display in "Map View".

NOTE: How do we know it is you sending the e-mail? Before you use the remote e-mail features you must visit the My Profile page from your Account Home (once you have logged in). The e-mail you send administrator@sailtrac.com must come from either:

- 1.) The e-mail address that you registered with, or;
- 2.) The secondary e-mail address that you gave at registration or provided us for reference on the My Profile page at a later date.

Add a Video Format

To send a video from any data plan enabled cell phone or wireless device capable of taking and sending videos you simply address your transmission to administrator@sailtrac.com. Put the video description name in the Subject line. The information below should be transmitted in the following format. The time of the position report in the text section of the e-mail should be filed in Greenwich Mean Time (GMT). Providing a latitude and longitude is optional. Make sure the video you submit is **less than 5 minutes in length, and smaller than 20MB**, and in an acceptable format. SailTrac accepts video files from most digital cameras, camcorders, and cell phones in the .AVI, .MOV, .WMV, and .MPG file formats. If you don't think your current video file format is recognized by SailTrac, you may get the best results from converting your file to MPEG4 video with MP3 audio. You may add up to **five (5) 20MB** video to every trip you create. **Send only ONE (1) Video per e-mail transmission.**

DATE: 2008/06/25 23:17
 LATITUDE: 48-51.30N
 LONGITUDE: 02-17.40E
 COMMENT: Up to 80 characters Naming Your Video

The TrekTrac system will automatically add the video to your Trip. It will update your Trip information IF:

- 1.) The date and time of the e-mail falls between the start and end dates of a trip you have created (not the GMT time you indicate in the body of the e-mail).

IF it does, then:

- 2.) Your video will be added to your Trip. If it is geotagged with a latitude and longitude it will also display but not play in "Map View".

NOTE: How do we know it is you sending the e-mail? Before you use the remote e-mail features you must visit the My Profile page from your Account Home (once you have logged in). The e-mail you send administrator@sailtrac.com must come from either:

- 1.) The e-mail address that you registered with, or;

- 2.) The secondary e-mail address that you gave at registration or provided us for reference on the My Profile page at a later date.
